SUMMARY

AI/ML and full-stack software engineer with expertise in machine learning models, NLP, and scalable system design. Skilled in leading cross-functional teams, architecting cloud-based solutions, and deploying AI-driven products that improve efficiency and decision-making. Experienced across the full development lifecycle, from data engineering and model optimization to production deployment in AWS and GCP environments.

PROFESSIONAL EXPERIENCE

Elite Innovative Solutions Inc: AI Software Engineer | Austin, TX **April 2025 – Present**

- Designed and deployed semantic search infrastructure (FastAPI, PostgreSQL, Elasticsearch) with synonym mapping and query parsing, boosting recruiter satisfaction by 30%.
- Automated resume parsing and job portal pipelines to standardize candidate data, ensuring scalability and compliance.
- Integrated LLMs to convert recruiter queries into Boolean expressions and generate candidate match scores, cutting time-to-hire by 20%.

FintradyLLC: Machine Learning Engineer Intern | Austin, TX **March 2025 - June 2025**

- Built a serverless options trading platform (AWS Lambda, API Gateway, React) handling real-time market data.
- Automated multi-leg strategies (CSPs, Covered Calls), improving trader execution speed by 40%.
- Implemented NLP-based strategy assistant with custom models, increasing strategy adoption by 15%.
- Optimized TypeScript-based frontend, reducing latency by 35%.

Veradigm: Data Analyst Intern | Raleigh, NC **May 2023 - August 2023**

- Delivered SQL-based reports and validated datasets for healthcare analytics, ensuring HIPAA compliance.
- Optimized ETL data flows, cutting query runtime by 25% in SSMS.
- Created documentation of data pipelines, reducing onboarding time for new analysts by 15%.

PROJECTS

Stock Market News Sentiment Analysis and Summarization: Introduction to NLP | UT Austin **November 2024**

- Built an AI system to analyze news sentiment and generate weekly market summaries.
- Used Word2Vec and BERT embeddings, improving sentiment classification accuracy by 12%.
- Enhanced stock prediction accuracy by incorporating sector-level sentiment insights

Plant Seedling Classification Using CNNs: Introduction to Computer Vision | UT Austin **October 2024**

- Developed a CNN classifier for 12 plant species; achieved 65% accuracy with data augmentation.
- Analyzed misclassifications and proposed advanced augmentation, paving way for higher accuracy in production use.

Gofit Chatbot: Senior Capstone Project | St. Edward's University **December 2023**

- Created an AI-powered fitness chatbot (OpenAI API) that increased user engagement by 25%.
- Implemented encoder-decoder architecture for improved response handling, cutting latency by 20%.
- Designed secure features (profiles, encrypted storage), ensuring compliance with data privacy standards.

WeGo Autonomous Vehicle Pickup & Delivery Platform: Software Engineering | St. Edward's University **May 2023**

- Led a 6-member Agile team to design and deploy a multi-cloud platform with real-time routing and trip scheduling
- Improved usability by 20% through user testing, feedback integration, and iterative design.
- Applied TDD and CI/CD, reducing deployment errors by 30% and ensuring reliable delivery; showcased results to clients

SKILLS

Programming & Tools: Python, Java, JavaScript (React, AngularJS), SQL, Docker, Kubernetes, REST APIs, Git

Cloud & Data: AWS, GCP, Hadoop, Kafka, PostgreSQL, Elasticsearch

AI/ML: NLP, Deep Learning, Neural Networks, TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib

EDUCATION

University of Texas, Austin, TX: Post Graduate Program in AI & ML: Business Applications **December 2024**

St. Edward's University, Austin, TX: Bachelor of Science, Computer Science **December 2023**

Honors & Certifications: Dean's Achievement Scholarship, Google Cloud Generative AI Fundamentals, Post-Grad Program in AI & ML: Business Applications UT McCombs Certificate, Microsoft Azure AI Essentials Professional Certificate
