SUMMARY

AI/ML and full-stack software engineer with expertise in machine learning models, NLP, and scalable system design. Skilled in leading cross-functional teams, architecting cloud-based solutions, and deploying AI-driven products that improve efficiency and decision-making. Experienced across the full development lifecycle, from data engineering and model optimization to production deployment in AWS and GCP environments.

PROFESSIONAL EXPERIENCE

Elite Innovative Solutions Inc: AI Software Engineer | Austin, TX **April 2025 – Present**

- Built semantic search infrastructure using FastAPI, PostgreSQL, and Elasticsearch, integrating Boolean logic, skill-synonym mapping, and query parsing to improve recruiter satisfaction.
- Developed resume-parsing and job portal pipelines to standardize candidate data for search and compliance scalability
- Integrated LLMs to translate recruiter queries into Boolean expressions and generate match scores, enhancing recruitment efficiency

FintradyLLC: Machine Learning Engineer Intern | Austin, TX **March 2025 - June 2025**

- Developed a serverless options trading platform (AWS Lambda, API Gateway) using Python and React
- Implemented multi-leg strategy automation (CSPs, Covered Calls) with real-time data pipelines
- Designed NLP-based strategy assistant using custom language models for trading workflows
- Reduced latency by 35% through optimized TypeScript-based frontend refactors

Veradigm: Data Analyst Intern | Raleigh, NC **May 2023 - August 2023**

- Assisted with SQL-based reporting and data validation for healthcare analytics
- Gained hands-on experience with ETL processes and HIPAA-compliant systems
- Documented data flows and optimized query performance in SSMS

PROJECTS

Stock Market News Sentiment Analysis and Summarization - Introduction to NLP | UT Austin **November 2024**

- Developed an AI-driven sentiment analysis system to process and analyze news articles to gauge market sentiment and generate weekly summaries.
- Utilized Word2Vec and BERT embeddings for sentiment classification with improved accuracy.
- Enhanced stock price prediction accuracy by integrating sector-specific sentiment insights.

Plant Seedling Classification Using CNNs - Introduction to Computer Vision | UT Austin **October 2024**

- Built an image classifier to distinguish between 12 plant species for agricultural applications.
- Achieved ~60-65% accuracy with data augmentation and CNN architecture improvements.
- Identified frequent misclassifications and proposed advanced augmentation techniques to enhance performance.

Gofit Chatbot: Senior Capstone Project | St. Edward's University **December 2023**

- Developed a fitness chatbot using OpenAI API, increasing engagement by 25% through personalized interactions
- Deployed machine learning models to tailor workout and nutrition plans using user feedback loops
- Engineered encoder-decoder architecture to improve response handling and reduce latency by 20%
- Built secure user-facing features including profiles, support channels, and encrypted data storage

SKILLS

Technical Skills: Python, Java, JavaScript (React, AngularJS), SQL, HTML/CSS, REST APIs, Docker, Kubernetes, AWS, GCP

AI/ML & Analytical Skills: NLP, Neural Networks, Deep Learning, Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow

Tools & Platforms: Git, Jupyter Notebook, Google Colab, Hadoop, Kafka, AWS API Gateway, Selenium

EDUCATION

University of Texas - Austin, TX: Post Graduate Program in AI & ML: Business Applications **December 2024**

St. Edward's University - Austin, TX: Bachelor of Science | Computer Science **December 2023**

Honors & Certifications: Dean's Achievement Scholarship, Google Cloud Generative AI Fundamentals, Post-Grad Program in AI & ML: Business Applications UT McCombs Certificate, Microsoft Azure AI Essentials Professional Certificate
