SUMMARY

Motivated software engineer with AI/ML and full-stack development expertise, specializing in machine learning models and natural language processing. Experienced in leading cross-functional teams to deliver scalable applications and integrate AI-driven solutions. Passionate about leveraging innovative technologies to solve complex challenges, seeking to contribute skills in software engineering and data-driven problem-solving in a dynamic team environment.

EDUCATION

University of Texas - Austin, TX: Post Graduate Program in AI & ML: Business Applications **April 2024 - December 2024**

St. Edward's University - Austin, TX: Bachelor of Science | Computer Science **August 2020 - December 2023**

Honors & Certifications: Dean's Achievement Scholarship, UX Design LinkedIn Learning Course, Google Cloud Generative AI Fundamentals, Encoder-Decoder Architecture, Post-Grad Program in AI & ML: Business Applications UT McCombs

PROFESSIONAL EXPERIENCE

Elite Innovative Solutions Inc: AI Software Engineer | Austin, TX **April 2025 – Present**

- Built semantic search infrastructure using FastAPI, PostgreSQL, and Elasticsearch, integrating Boolean logic, skill-synonym mapping, and query parsing to improve recruiter satisfaction.
- Developed resume-parsing and job portal pipelines to standardize candidate data for search and compliance scalability
- Integrated LLMs to translate recruiter queries into Boolean expressions and generate match scores, enhancing recruitment efficiency

Taskformer: AI Software Engineer | Remote **May 2025 - June 2025**

- Spearheaded the development of an AI-powered resume-matching platform backed by Mercor, Anthropic, and more
- Constructed a full-stack web application using Next.js, Node.js, and GPT-4 to match resumes to job descriptions via NLP
- Implemented batch resume processing and document parsing (PDF, DOCX, TXT) with automated skill extraction
- Delivered semantic search UI for recruiters, enhancing candidate relevance and placement speed

FintradyLLC: Machine Learning Engineer Intern | Austin, TX **March 2025 - June 2025**

- Developed a serverless options trading platform (AWS Lambda, API Gateway) using Python and React
- Implemented multi-leg strategy automation (CSPs, Covered Calls) with real-time data pipelines
- Designed NLP-based strategy assistant using custom language models for trading workflows
- Reduced latency by 35% through optimized TypeScript-based frontend refactors

SuperAnnotate: Creative Writing - AI Data Trainer (Contract) | Remote **March 2024 - May 2024**

- Generated and reviewed 200+ AI prompts to enhance LLM training accuracy
- Identified and corrected model bias in annotated datasets for production refinement
- Evaluated model performance across diverse domains and recommended improvements

Veradigm: Data Analyst Intern | Raleigh, NC **May 2023 - August 2023**

- Assisted with SQL-based reporting and data validation for healthcare analytics
- Gained hands-on experience with ETL processes and HIPAA-compliant systems
- Documented data flows and optimized query performance in SSMS

PROJECTS

Stock Market News Sentiment Analysis and Summarization - Introduction to NLP | UT Austin **November 2024**

- Developed an AI-driven sentiment analysis system to process and analyze news articles to gauge market sentiment and generate weekly summaries.
- Utilized Word2Vec and BERT embeddings for sentiment classification with improved accuracy.
- Enhanced stock price prediction accuracy by integrating sector-specific sentiment insights.

Plant Seedling Classification Using CNNs - Introduction to Computer Vision | UT Austin **October 2024**

- Built an image classifier to distinguish between 12 plant species for agricultural applications.
- Achieved ~60-65% accuracy with data augmentation and CNN architecture improvements.
- Identified frequent misclassifications and proposed advanced augmentation techniques to enhance performance.

Bank Customer Churn Prediction - Introduction to Neural Networks | UT Austin

September 2024

- Predicted customer churn and provided actionable recommendations to reduce attrition.
- Implemented a neural network using TensorFlow and addressed class imbalance with SMOTE.

Credit Card User Churn Prediction - Advanced Machine Learning | UT Austin

August 2024

- Built a predictive model to determine customer churn reasons and provided business strategies for retention.
- Leveraged Random Forest and Boosting techniques to improve prediction accuracy.
- Delivered recommendations to target at-risk demographics with personalized offers.

Gofit Chatbot: Senior Capstone Project | St. Edward's University

December 2023

- Developed a fitness chatbot using OpenAI API, increasing engagement by 25% through personalized interactions
- Deployed machine learning models to tailor workout and nutrition plans using user feedback loops
- Engineered encoder-decoder architecture to improve response handling and reduce latency by 20%
- Built secure user-facing features including profiles, support channels, and encrypted data storage

ACADEMIC EXPERIENCE

Software Engineering: St. Edward's University

May 2023

- Directed agile scrum team to build a multi-cloud autonomous delivery platform integrating cross-functional inputs
- Deployed CI/CD pipelines and enforced DevOps standards using Git, Nginx, and test-driven development
- Synthesized user feedback and technical specs into actionable tasks, presenting to stakeholders bi-weekly
- Delivered final product and presented system architecture to external industry reviewers

SKILLS

Programming Languages & Packages: Python, Java, HTML, CSS, JavaScript, PHP, RegEx, SQL, AJAX, JQuery, React, Git, Swift, Prolog, Haskell, AngularJS, NumPy, Pandas, Seaborn, Matplotlib, Scikit-learn, TensorFlow

AI/ML Skills: Natural Language Processing (NLP), Neural Networks, Feature Engineering, Deep Learning, Model Deployment, MLOps, Model Interpretability (e.g., SHAP, LIME), Data Preprocessing, Ensemble Methods

Software Engineering Skills: Microservices, REST APIs, Docker, Kubernetes, AWS Lambda, Unit Testing, Containerization, Test-Driven Development (TDD), Version Control (Git), CI/CD Pipelines, Cloud Environments (AWS, Google Cloud)

Tools & Frameworks: VSCODE, Git, JSON, Microsoft Office, Eclipse, PyCharm, MySQL Workbench, FileZilla, Apache, DigitalOcean Droplet, Xcode, Trello, Slack, SQL Server Management Studio, Jupyter Notebook, Google Colab, Figma, SQL Server Integration Services, Hadoop, Selenium, Kafka, Cursor AI, AWS API Gateway, Tradier API
